

Epsit is the co-founder at 4Dea, a company working in the field of virtual reality and interactive media. He is an alumnus of IIT Gandhinagar, graduated in the 2015 batch with B.Tech major in Mechanical Engineering and minor in Management.

Epsit is a Gandhian Young Technological Innovation Awardee for the year 2015 for making an ergonomic and low cost mechanical Spoon for Parkinson's patients. His drive to always do something new and different that can make a difference in this world has led him choose entrepreneurship as career. Although he aspires to join Indian Administrative Services and bring a direct change to the society, currently he is trying his hands on running a company and gaining experience in handling its day-to-day matters in marketing, sales and business development.

His interests lie in travelling across the world and meeting new people, getting hands on new adventures while trying to identify and find solution to real world problems. He has a deep interest in music with himself being a percussionist who plays all kinds of Indian and Western drums. He also love reading with special interests in Indian politics, history and current affairs.
